MEMORANDUM FOR THE RECORD

SUBJECT: Burroughs Computer Systems

1. On 3 October the US Customs Service contacted the IC Staff requesting the status of the Burroughs 6900 computer systems. This past July Customs management in Washington decided not to procure the 6900 computers from CIA despite recommendations from their technical staff to acquire the systems. The Burroughs issue has now resurfaced and Customs indicated that they "should have taken the systems in July."

2. Customs was advised by the IC Staff that the response to GSA's 9 September notice, advertising the availability of these systems, has been overwhelming. Therefore, GSA has requested that interested agencies submit letters of interest and justification to GSA by COB 4 October 1983. System placement will be made based on these letters. Customs indicated they would take immediate action.
